LNG Safety Issues - A FERC Perspective

Chris Zerby
Federal Energy Regulatory Commission
Chris.Zerby@ferc.gov

Abstract

The presentation will briefly explain: the roles of the federal agencies responsible for LNG safety and how their processes are incorporated into the Commission’s environmental impact statements for LNG import terminals; the analysis of safety issues for ship unloading, storage and send-out facilities; the evaluation of marine safety, security and navigational issues for LNG vessel transits; and the impact of the Energy Policy Act of 2005 on project sponsors, state agencies and the Commission.
